

Muhammad Fahim Alimi bin Che Omar | Software Engineer

Kuala Lumpur, Malaysia | +60 19-464 2610 | fahimalimi16@gmail.com

PROFESSIONAL SUMMARY

Software Engineer specializing in full-stack web and mobile development. Built and launched **KTNB Travel**, a production travel-booking platform integrating Sabre GDS, Agoda, SSO, payment gateways, and inventory management. Experienced in Next.js, React Native, TypeScript, PostgreSQL, and cloud infrastructure, with additional expertise in hosting, server administration, and cybersecurity.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Dart, Python, PHP, Java, SQL

Frontend: Next.js, React, React Native, Flutter, Tailwind CSS, Laravel

Integrations: Sabre GDS, Agoda API, OpenID Connect, ToyyibPay, Billplz, FPX

Tools : Git, Postman, Blender, Claude, VS Code, Vitest, DBeaver

Backend & Database: Node.js, Flask, PostgreSQL, MySQL, Firebase, ERPNext (Frappe)

Cloud & DevOps: AWS S3, Garage (S3-compatible storage), Linux, VPS, cPanel, WHM, DNS, Docker

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Fibernatic PLT

Jan 2026 – Present

Seri Kembangan, Malaysia

- Sole engineer responsible for designing and developing **KTNB Travel**, a full-stack travel-booking platform supporting flights, hotels, travel packages, and e-commerce services using Next.js, TypeScript, PostgreSQL, and Tailwind CSS.
- Integrated **Sabre GDS** and **Agoda API** to enable real-time flight and hotel search, booking, ticket issuance, and commission tracking.
- Engineered a race-safe inventory reservation system with automated expiry controls, preventing overselling during concurrent bookings.
- Developed a resilient payment architecture supporting FPX, cards, and e-wallets through webhook-driven processing and automated reconciliation.
- Implemented OpenID Connect SSO, role-based access control, self-hosted garage for upload pictures, secure approval workflows, and PDPA-compliant data protection mechanisms.
- Built operational dashboards, analytics, reporting, refund management, and audit logging tools for business users.
- Built an admin dashboard with real-time booking and revenue analytics, full booking and order lifecycle management, refund approval chains, and CSV/PDF reporting, backed by an immutable audit log.

IT Support Engineer, Fibernatic PLT

Mar 2025 – Dec 2025

Seri Kembangan, Malaysia

- Promoted to Software Engineer within 10 months based on technical performance and project contributions.
- Delivered Tier 2/3 support for cPanel, Plesk, VPS, and Linux hosting environments.
- Diagnosed server performance issues involving CPU, memory, I/O bottlenecks, and resource limitations.
- Secured hosting infrastructure using CSF, Imunify360, and cPHulk while mitigating malware and unauthorized access incidents.
- Managed DNS, SPF, DKIM, and DMARC configurations to improve email deliverability and security.
- Supported server migrations, hosting deployments, and client onboarding activities.

- Supported Manufacturing Execution System (MES) operations and resolved system integration issues with an Oracle backend.
- Assisted developers in enhancing MES features and workflows to improve production tracking accuracy.
- Built an internal knowledge base website using MkDocs and Python, reducing troubleshooting time by approximately 25%.

SELECTED PROJECTS

NGOconnect - NGO Management & Donation Platform

- Led development of a full-stack NGO management platform replacing a legacy WordPress solution.
- Developed donation, volunteer, event management, and payment processing modules.
- Integrated ToyyibPay and QR-based campaign tracking to improve operational efficiency and scalability.

MyKoptnb - Multi-Service Mobile Super App

- Developed a multi-service mobile application with modular architecture supporting authentication, profile management, and QR-based features.
- Implemented AWS S3 for image uploads.
- Integrated a voting system across the mobile app and admin dashboard backend to handle vote processing.
- Built e-commerce functionality including product listings, cart, and checkout.
- Integrated push notifications and dynamic theming (dark and light modes).

ERP Mobile Application

- Developed a mobile application integrated with an ERPNext backend, including HR modules and customized enterprise workflows.
- Enabled real-time data synchronization between mobile clients and the server(doctype).

Anxiety Treatment Suggestion App - Final Year Project

- Developed a mobile app suggesting anxiety treatments based on accelerometer data.
- Applied a collaborative filtering algorithm to deliver personalized recommendations.
- Built a Flask API backend to process treatment data and serve recommendations to the mobile client.

EDUCATION

Bachelor of Computer Science (Hons.); Major in Mobile Computing

2021 – Feb 2025

Universiti Teknologi MARA (UiTM) | CGPA: 3.43

Dean's List, Semesters 1, 5, and 6.

Matriculation Programme, Engineering

2020 – 2021

Kolej Matrikulasi Kejuruteraan Kedah | CGPA: 3.50
